Mortise Locks—Specifications

- Most working parts are manufactured of solid forged brass material, precisely machined for maximum strength and smooth, lifetime operation. (Forgings have a 250% greater tensile strength than castings.)
- All lock cases are constructed of heavy gauge steel (.093–2.4mm - material) and plated with a protective rust-resistant coating to retard oxidation.
- Most lock functions are completely reversible in the field to facilitate installation.
- All locks and strikes are designed to fit standard preparation ANSI A115.1 (face cutouts are subject to variation). Locks have adjustable forged brass lock fronts, protected by armored scalp fronts for ultimate strength and protection against tampering.
- Please see ordering instructions and mortise lock/strike specification chart in this section for curved lip or extended lip strikes.
- All KEYED lock functions illustrated within this section are furnished with a specially-designed security strike constructed of high grade steel for ultimate strength and durability. The security strike is mortised into the wood jamb and anchored to the structural components of the opening with two 3” steel screws and covered with a finished strike to conceal the fasteners.
- Locks of 2.5” (64mm) and 2.75” (70mm) backsets are equipped with a 1” (25mm) throw deadbolt with two hardened steel inserts for maximum protection and security. All deadbolts are of forged brass construction. Locks designed with 1.5” (38mm) and 2” (51mm) backsets have a .5” (13mm) throw deadbolt.
- All 2.75” (70mm) and 2.5” (64mm) backset locks are furnished standard with an anti-friction latch bolt of .625” (16mm) throw and 1.25” (32mm) wide front.
- All 1.5” (38mm) and 2” (51mm) backset locks are furnished standard with a solid latch bolt of .5” (13mm) throw and 1” (25mm) wide front. An optional 1.25” (32mm) wide front is available. (Consult Price List for details.)
- All keys are designed with a 1.25” (32mm) wide bow surface to facilitate use by disabled and physically handicapped people.
- Our Design Department works closely with a number of America’s most prestigious museums and historical foundations. Baldwin is renowned for meeting the stringent demands for quality and authenticity in the restoration-retrofit-rehabilitation markets.
- Numerous patents, copyrights, and trademarks are held by the Corporation to protect the integrity and reputation of our distinctive line of hardware appointments.
RABBETED DOOR CONDITIONS

FEATURES: Rabbeted strikes and pieces are used on pairs of doors that have a meeting rail which is rabbeted or on single doors that have a rabbeted frame. The strike is designed to fit in a .5" (13mm) rabbet; a separate rabbeted piece conforms to the face of the lock. This rabbeted assembly is available for locks with 1.25" (32mm) wide fronts only.

SIZES: Strike 1" x 5" (25 x 127mm) (Non-Handed); Rabbeted Piece: .5" x 8" (13 x 203mm)

IMPORTANT NOTES:
1. RABBETED STRIKE AND PIECE ARE ONLY AVAILABLE FOR 1.75" (44mm) DOORS.
2. When a rabbeted strike is ordered in conjunction with a keyed function lock, a steel security strike is NOT supplied.

PACKED: One complete set in a box with appropriate fasteners.

ORDERING INSTRUCTIONS: No. 6897 — Used with all 1.5" (38mm), 2" (51mm), 2.5" (64mm) backset locks (6300, 6800 Series). All locks which are furnished standard with a 1" (25mm) wide front must be ordered with a 1.25" (32mm) wide front. Consult price list for surcharge.
All Baldwin product numbers have a minimum of seven (7) digits. The first four (4) digits indicate the product, e.g. 6001 is a 2.75" backset, entrance function mortise lock. The next three (3) digits indicate the finish, e.g. 003 is PVD brass. Therefore, 6001.003 indicates a 2.75" backset, entrance function mortise lock in PVD finish.

In addition to the seven (7) base numbers, a suffix of from one (1) to four (4) digits or letters is sometimes used. These characters are placed to the right of the finish; e.g. 6001.003.RLS indicates a 2.75" backset, right hand entrance function mortise lock in PVD finish supplied with hub springs of sufficient strength to be used with levers.

NOTE: ENTRANCE FUNCTION LOCKS MAY BE USED IN EITHER SINGLE CYLINDER OR DOUBLE CYLINDER APPLICATIONS.

TO ORDER: 2.75”/2.5” BACKSET LOCKS FOR LEVERS, SPECIFY LS (LEVER STRENGTH) AFTER LOCK NUMBER (i.e. 6375.030.RLS LOCK - RH).

NOTE: 1.5” and 2.0” Backset Locks are designed to be used with levers. If knobs are specified, customer should be advised that the knob will only turn in one direction and will have a stiff turning action: NOT RECOMMENDED.

CURVED LIP STRIKES: Locks may be ordered with curved lip strikes. The hand of strike will match the hand of the door. Please specify hand of door when ordering. A left hand reverse door will use a right hand strike and a right hand reverse door will use a left hand strike.

DOOR CONDITIONS

HAND OF DOOR IS ALWAYS DETERMINED FROM THE OUTSIDE

Here are a few rules to follow:
■ The outside of an exterior door is the street or entrance side.
■ The outside of a room door is the hall side.
■ The outside of a single communicating door is the side from which the hinges are not visible when the door is closed.
■ The outside of a closet door is the room or hall side.

HEAVY DUTY MORTISE LOCKS
FOR DOORS 1.75” (44mm) THICK AND OVER

LOCK SPECIFICATIONS: Standardized heavy steel case is smooth, easy to mortise, and assures snug and solid fit in door mortise. Vital interior working parts are made of solid hot forged brass or steel for a lifetime of trouble-free operation. Armored front provides maximum strength and protection against tampering. Most lock functions are completely reversible. The bevel of front is adjustable from flat to standard bevel .125” on 2” (3mm on 51mm). Most metal door and frame manufacturers have provided reinforcements for Baldwin Mortise Locks.

STEEL CASE: .875” × 4” × 5.5” (22 × 102 × 140mm)
FRONT: Hot forged brass .218” × 1.25” × 8” (6 × 32 × 203mm). Adjustable for beveled conditions.
SCALP: Wrought brass and bronze, available in standard finishes.
ANTI-FRICTION LATCH BOLT: Hot forged brass .625” × 1” (16 × 25mm) × .75” (19mm) throw. Furnished in US4 and 26D finishes to match trim. Solid latch bolt is available and when ordered, is furnished with a curved lip strike.
DEAD BOLT: .5” × 1.25” (13 × 32mm) × 1” (25mm) throw with two saw-proof inserts. Furnished in US4 and 26D finishes to match trim.
HUB SIZE: .29” (7mm) with two-way rotation. Broached on the diamond. (One-way rotation on LS functions).
BACKSET: 2.75” (70mm)
SPACING: center to center of:
Knob Hub to cylinder 3.437” (87mm)
Knob Hub to turn piece 2.25” (57mm)
CYLINDER: Standard mortise type with 03 keyway and two nickel silver keys. Cylinder is not supplied with lock.
KEYING: All levels of Keying including Construction Keying are available. For additional information, refer to Section K.
STRIKE: Wrought brass and bronze finished to match. Supplied to ANSI standard A115.1, 1.25” (32mm) lip to center. Locks furnished standard with straight lip strike (Universal) and dust box. Curved lip and special length strikes available. All KEYED lock functions are furnished standard with a high grade steel security strike and two 3” steel screws.
TEMPLATE: Metal doors/frames to be prepared in accordance with ANSI A115.1 or A115.11. FACE CUTOUTS ARE SUBJECT TO VARIATION. ALWAYS REVIEW TRIM REQUIREMENTS BEFORE DOOR PREPARATION.

HOTEL
Latch bolt by knob inside and key outside. Outside knob is always rigid.
Deadbolt by turn piece inside which shuts out all keys except emergency and
display keys. Inside knob retracts latch bolt and deadbolt simultaneously.
Auxiliary latch deadlocks latch bolt.
1” (25mm) throw deadbolt with saw-proof inserts is standard equipment.
Furnished standard with a 1.25” (32mm) wide key bow and 6 pin cylinder.
Hotel key bow is available at an additional charge. Consult price list.
WEIGHT: 3 lbs. (1.36kg)
NOTE: NOT FIELD REVERSIBLE.

ENTRANCE—EMERGENCY EGRESS
Latch bolt by knob from either side, except when outside knob is locked by
stop in front. When outside knob is locked, the latch bolt and dead bolt are
retracted by key outside and knob inside. Dead bolt by key either side. When
extended, dead bolt automatically locks outside knob. Inside knob retracts
latch and dead bolt simultaneously but DOES NOT free outside knob. When
extended, dead bolt deadlocks latch bolt. 1” (25mm) throw dead bolt with
saw-proof inserts is standard equipment.
Auxiliary latch bolt deadlocks latch bolt, creating a DOUBLE DEADLOCKING
FEATURE when the dead bolt is extended.
IMPORTANT: This lock function is specially developed for use on exterior
doors on commercial projects. The stops cannot be activated unless a key is
used to engage/disengage the stop mechanisms. This feature prohibits an
unauthorized individual from locking or unlocking the door. When the deadbolt
is thrown, both the dead bolt and auxiliary latch bolt guard the latch bolt from
being retracted. Designed expressly for buildings where security guards
strictly control the access to/from the building. Each cylinder can be master
keyed differently to meet specific keying requirements.

DUTY: Continuous

SOLENOID LEAD WIRE LENGTH: 6” (153mm)

IMPORTANT FEATURE: To facilitate installation, Solenoid is constructed inside the lock case.

IMPORTANT NOTES:
1. Each electrified lock should have its own 24 volt transformer. Two or more locks may be operated in PARALLEL from a single transformer with the proper current rating. DO NOT connect locks in a series from a higher rated transformer.
2. We DO NOT recommend wiring electrified locks to a circuit containing electromagnetic devices as transient voltage can cause damage to the lock. Transient voltage must be suppressed at its source before connecting locks to the circuit.
3. A Varistor at 35 volts (peak-recurrent) may be used for transient voltage protection.
